ScienceSoft was established in 1989. Since that date the company keeps honorable position of pioneer in IT field among Eastern Europe companies.

For 19 years of its existence ScienceSoft's professional team have completed more than 300 large projects. Remarkable that some of these projects required over 100 man years.

Incomparable quality of ScienceSoft's software products has been already appreciated by our customers around the globe. Over 200 companies in 24 countries have already trusted us their outsourcing projects.

www.scnsoft.com

ScienceSoft provides a Full Software Development Life Cycle (SFDL) that includes envisioning, planning, design and development, testing, delivery and support phases. All stages of SFDL are transparent for the customer so the project could be monitored and controlled on every phase. The success of this approach is obvious as more than 78% of our customers apply for services we produce again.

«ScienceSoft designed and engineered TycoonResearch.com from beginning to end. They explained the entire development process to me, created project timelines and always delivered when they promised. They are total professionals. I will definitely work with them again and am currently in the process of giving them referrals.»

Dylan Jovine, CEO, Tycoon Research, USA

Why customers choose us

We provide the complete set of services: starting from design and investigation to maintenance and support

We offer a variety of partnership models: onsite, offsite, combined onsite/offsite, etc.

We put strong emphasis on security and confidentiality, as well as intellectual property protection.

We use the best quality and processes standards: ISO 9001:2000, CMMI, GAMP.

All our team members have Master Degrees in Computer Sciences and 3 years' experience.

Our developers are true researchers with an innovative mind that ensures individual creative approach.

We ensure transparency of our development process to customers at any where.

Our specialists are easy to communicate with in English.

We are ready to align work schedules to guarantee quick response for any of the customer' request.
